PROFESSIONAL SUMMARY

Experienced Software Engineer with years of expertise in full-stack development and system integrations. Known for resolving complex problems, improving customer satisfaction, and driving operational efficiency. Skilled in delivering high-quality software solutions by leveraging modern development practices and tools. Experienced in AI-assisted software development with tools such as Claude Code and OpenAI models to accelerate delivery and improve code quality. Quick to learn and adapt to new technologies to meet evolving business needs.

TECHNICAL SKILLS

- .NET Technologies: .NET Framework, .NET Core, .NET 6/7/8/9/10, ASP.NET MVC, EF, xUnit, NUnit
- Backend: C#, Node.js, Express.js, PHP, Java, Spring Boot
- Frontend: React.js, Angular, JavaScript, HTML5, Bootstrap, jQuery, CSS
- Mobile: Flutter
- Databases: MSSQL, MySQL, PostgreSQL, Redis, MongoDB
- APIs: REST APIs, GraphQL
- Tools: Postman, Swagger, Docker, Azure DevOps, Jenkins, GitHub, GitLab
- AI Tools: Claude Code, Claude (Anthropic API), OpenAI API (GPT models), ChatGPT, GitHub Copilot, prompt engineering, AI-assisted code review and refactoring
- Server Technologies: Nginx, Apache, IIS
- Other: Socket.io, Phaser 3, Microsoft Dynamics NAV/D365

WORK HISTORY

Software Engineer — Craft Silicon Ltd

Nov 2024 — Present

Backend engineer focused on building and maintaining enterprise integration solutions for financial institutions across Africa and Asia.

- Backend Development & APIs: Design and maintain RESTful APIs and background job processors using .NET 8/9/10 and .NET Framework (4.7/4.8), supporting payment processing, regulatory reporting, and loan management workflows for banks, microfinance institutions, and payment processors.
- Systems Integration: Implement integrations with core banking systems, payment gateways (FlyGate/Ethiopian Airlines, Co-op Bank, NCBA LMS, EthSwitch IPS), telecom billing platforms (Ethiotelecom/Huawei CBS), and other third-party services — handling SOAP, REST, and ISO 8583-adjacent messaging formats.
- Windows Services & Job Processing: Build and maintain Windows Services and Quartz.NET-based background job processors for tasks including PNR retry logic, CBK regulatory report submission, BNPL callback processing, and dead-letter reprocessing.
- Regulatory & Compliance Engineering: Develop data pipelines and stored procedures (SQL Server) supporting CBK regulatory reporting submissions, including sync jobs, retry mechanisms, and email notification infrastructure for compliance teams.
- DevOps & Deployment: Manage multi-environment CI/CD pipelines on Azure DevOps, including build configurations, XDT transforms (SlowCheetah), and publish profiles across UAT and Production environments.
- AI-Assisted Development: Use Claude Code and OpenAI tools to accelerate development, debugging, and root-cause analysis, generate and review stored procedures and C# code, refactor legacy .NET Framework services, and produce technical documentation.

Full-Stack Developer — Consultant Developer

Apr 2023 — Nov 2024

Full stack software development consulting services for various clients involving integrations and web application development.

- Document Management System: Integrated ONA and KoboToolbox for streamlined document workflows.
- Patient–Doctor Experience Management System: Enhanced patient interaction through a custom system.
- Electronics E-Commerce System: Developed an inventory management system for an electronics shop.
- D365 Integrations: Developed web portals with seamless Microsoft Dynamics NAV/D365 integration.
- Hospital Receipt/Invoice System: Implemented a patient management system to streamline billing.

Software Developer — Anvil Shield Group *Apr 2022 — Feb 2023*

- Developed endpoints for payment system functionality; source code reviews and codebase management.
- Added new features and improved existing system features; involved in system design and development activities, and mentored junior developers.

Systems Developer — Smart Applications Group *Apr 2021 — Apr 2022*

- Designed, developed, and implemented web portals to assist users on smart card management system interactions.
- Designed, developed, and implemented integration endpoints; mentored junior system developers, working as a team toward overall system functionality improvements.

Web Applications Developer — Dynasoft Business Solutions Ltd *Oct 2018 — Feb 2021*

- Integrated web portal applications with Microsoft Dynamics NAV ERP systems; performed code reviews, testing, and version control.
- System design and development; improvement of system features and addition of new features to existing systems.

Systems Developer — Surestep Systems and Solutions *May 2017 — Oct 2018*

- Integrated web portal applications with Microsoft Dynamics NAV ERP systems.
- System analysis, design, and development improvements.

EDUCATION

BSc. Computer Science — Kenyatta University

School of Engineering and Technology · Specialization: Software Development · 2nd Class Honours, Upper Division · 2011–2015
